

OLAJOBI MOH'D MUHTADY A.

AI AGENT & AUTOMATION DEVELOPER

Ikotun, Lagos, Nigeria | Muhtadyajibola@gmail.com | +234-701-669-4886

LinkedIn: [linkedin.com/in/muhtady-olajobi-795b131b6](https://www.linkedin.com/in/muhtady-olajobi-795b131b6) | GitHub: github.com/TeddyM1975

PROFESSIONAL SUMMARY

AI Agent and Automation Developer with 6+ years of data experience and hands-on expertise building intelligent, event-driven systems — from n8n workflow orchestration and LLM-powered chatbots to real-time API automation pipelines. Currently serving as AI Engineer at Circlehq Company, delivering agentic AI systems using n8n, Airtable, and Building Automation Systems. At GlobalPay, designed an Applicant Tracking System (ATS) and automated financial data pipelines connecting Power BI to AWS RDS PostgreSQL. Built production-grade AI agents including a RAG-based Q&A bot, a WhatsApp notification system, and a Paris Travel Chatbot using OpenAI GPT. Founder of Horizon Management Tech Solutions (H.M.T.), delivering affordable AI and automation solutions to schools and SMEs across Nigeria.

PROFESSIONAL EXPERIENCE

AI Engineer | Circlehq Company · ContractLagos, Nigeria · Remote | Oct 2025 – Present

- Architected and deployed agentic AI workflows using n8n for multi-step process automation, integrating third-party APIs and internal data sources into unified automation pipelines.
- Built and managed Airtable-based data management systems as the structured backbone for automated workflows and project tracking across teams.
- Designed Building Automation Systems (BAS) integrations to connect physical/operational data streams into intelligent automation flows.
- Led AI project management end-to-end: scoping requirements, designing agentic architectures, coordinating delivery, and iterating on automation logic based on stakeholder feedback.
- Developed LLM-powered agent components with prompt orchestration, tool-use patterns, and session memory for context-aware multi-turn interactions.
- Skills: n8n · Agentic AI Development · Airtable · Building Automation Systems · Project Management

Product Analyst (AI & Automation) | GlobalPay · InternshipLagos, Nigeria | Jan 2026 – Present

- Designed and built an Applicant Tracking System (ATS) to automate the end-to-end recruitment pipeline — from job posting ingestion and CV parsing to candidate scoring and status tracking.
- Implemented Agentic AI Development patterns within the product analytics workflow, automating data extraction, transformation, and reporting loops.
- Automated financial reporting pipelines: connected Power BI to AWS RDS (PostgreSQL) via Python (Pandas/Pysocks2) and REST-based connectors, eliminating manual data extraction.
- Engineered a custom DAX transaction classification engine (SWITCH/CONTAINSSTRING) to map raw TIDs to merchant/bank categories — replacing a 100% manual tagging process.
- Configured Power BI Gateway for automated 24/7 cloud refresh schedules, removing manual intervention from the reporting cycle entirely.
- Integrated Translytical Task Flows in Power BI for real-time data write-back, bridging reporting and operational action.
- Leveraged Power BI Activity Logs and Microsoft Purview to automate data lineage monitoring and compliance enforcement.
- Skills: Python · PostgreSQL · Agentic AI Development · Power BI · DAX

Founder & Lead AI Developer | Horizon Management Tech Solutions (H.M.T.) · Self-employedRemote | Apr 2025 – Present

- Founded H.M.T. to deliver affordable AI, automation, and data analytics products to schools and SMEs across Nigeria.
- Designed and shipped the Smart School Notification System — a fully automated event-driven platform combining QR attendance scanning, PostgreSQL storage, and WhatsApp/SMS API notifications via Termii.

- Providing services across: AI & ML Solutions, Data Analytics & Dashboarding, Custom Automation Development, and NLP/chatbot products.

Freelance Data Analyst | *Freelancer.com · FreelanceLagos, Nigeria* | Jun 2019 – Present

- Delivered end-to-end data analysis, dashboard development, and automation solutions for clients across multiple industries over 6+ years.
- Projects span HR analytics, sales reporting, financial dashboards, and predictive modelling using Python, SQL, Power BI, and Excel.

AI AGENT & AUTOMATION PROJECTS

Applicant Tracking System (ATS) — *Python · PostgreSQL · Automation · GlobalPay*

- Designed and built a full ATS to automate recruitment workflows: job listing management, CV intake, candidate scoring logic, and pipeline status tracking.
- Integrated automated notification triggers and data write-back so hiring managers receive real-time updates without manual intervention.

Wikipedia Q&A AI Agent (RAG + LLM) — *Python · Hugging Face · FAISS · DistilBERT*

- Built an autonomous question-answering agent using Retrieval-Augmented Generation (RAG): FAISS vector store for document indexing + DistilBERT for semantic comprehension.
- Agent dynamically retrieves, ranks, and synthesises knowledge chunks before generating grounded answers — no hallucinations from static prompts. | GitHub: github.com/TeddyM1975/Wikipedia_Question_Answering_Bot

Paris Travel Chatbot Agent — *Python · OpenAI GPT · Flask*

- Developed a conversational AI agent with session memory, intent recognition, and contextual response generation using OpenAI GPT APIs and custom prompt orchestration.
- Deployed via Flask with stateful session handling for multi-turn conversations — demonstrating agentic loop design patterns.

School Attendance Automation System — *Python · PostgreSQL · QR Code · Termii WhatsApp API*

- Designed a fully automated event-driven pipeline: QR scan → PostgreSQL write → WhatsApp API notification to parents within seconds.
- Achieved 90%+ attendance tracking accuracy and 70% reduction in manual reporting time. Architected for multi-school cloud scalability. | GitHub: github.com/TeddyM1975/SchoolTrack

Automated Financial Reporting Dashboard — *Power BI · Python · DAX · Power Query*

- Built a 'drop-and-refresh' pipeline: folder-monitored ETL auto-detects new transaction files, cleans/transforms data, and refreshes dashboards — zero manual steps.
- Configured automated Power BI Gateway refresh schedules providing 24/7 real-time financial insights to senior management.

Loan Approval Decision Agent — *Python · Scikit-learn · Pandas*

- Trained and deployed a classification ML model (91% accuracy) as an automated decision-support agent for loan approval workflows. | GitHub: github.com/TeddyM1975/Loan-Approval

TECHNICAL SKILLS

- **Agentic AI & LLMs:** n8n, LLM Agents, RAG (FAISS), OpenAI GPT API, Hugging Face Transformers, DistilBERT, Prompt Engineering, Agentic AI Development
- **Automation & Orchestration:** n8n, REST APIs, Webhooks, Power Automate, Event-Driven Architectures, Building Automation Systems (BAS), Airtable
- **API & Integration:** Termii (WhatsApp/SMS), OpenAI API, Psycopg2 (PostgreSQL), ODBC Connectors, Power BI Gateway
- **Programming:** Python (Pandas, NumPy, Scikit-learn, BeautifulSoup, Flask, Streamlit, Dash), SQL
- **Databases & Cloud:** PostgreSQL, AWS RDS, SSL/TLS, Data Modelling
- **BI & Data:** Power BI (DAX, Power Query), Excel
- **Project Management:** End-to-end AI project delivery, stakeholder management, agile iteration
- **Version Control:** Git, GitHub

CERTIFICATIONS

- **Associate Data Scientist** — *DataCamp* | *Oct 2024 – Oct 2026* | *ID: DSA0011107431978*
- **Data Analyst** — *DataCamp* | *Aug 2025 – Aug 2027* | *ID: DA0022392231611*
- **Data Analyst Associate** — *DataCamp* | *Aug 2025 – Aug 2027* | *ID: DAA0011107431978*
- **Data Engineer Associate** — *DataCamp* | *Dec 2024 – Dec 2026* | *ID: DEA0019298694885*
- **Complete Machine Learning & Data Science Bootcamp** — *Udemy* | *Dec 2020* | *ID: UC-584a8247-052d-4bf3-9641-2a3e514697a4*
- **Machine Learning with Tree-Based Models in Python** — *DataCamp* | *Completed*
- **The Complete Python Bootcamp from Zero to Hero** — *Udemy* | *Completed*

EDUCATION

Bachelor of Engineering – Metallurgical & Materials Engineering

University of Lagos, Yaba, Lagos State | *Jan 2018 – Jan 2025*
